EXPERIENCE

Flutter Developer Oct 2023 - Current
Samriddhi Automations Pvt. Ltd. *Panipat , Haryana*

- Proficient in developing cross-platform mobile applications using the Flutter framework, leveraging its rich set of pre-built widgets and robust architecture.
- Developed "VMS (Video Management Software)" enabling live CCTV camera viewing, video playback, and event monitoring for comprehensive surveillance. Solely conceived, designed, and implemented the project.
- Designed "HRMS (Human Resource Management System)" facilitating location-based attendance marking, leave application, and salary viewing for streamlined workforce management. Solely conceptualized and developed the entire system.

PROJECTS

VMS (Video Management Software)

- Developed comprehensive video management solution enabling live CCTV camera viewing.
- Implemented seamless video playback functionality with integrated PTZ (Pan-Tilt-Zoom) camera control for enhanced surveillance and event monitoring capabilities.
- Ensured intuitive user interface for effortless navigation and enhanced user experience.

HRMS (Human Resource Management System)

- Designed HRMS facilitating location-based attendance marking for precise tracking.
- Incorporated features for leave application, salary viewing, and streamlined workforce management.
- Ensured data privacy and security measures adhering to industry standards.
